About Me

Enthusiastic Frontend Developer with strong skills in React, JavaScript, and modern UI framework, Experienced in building responsive web applications and eager to contribute to innovative projects while enhancing user experience.

PROJECTS

TO DO APP - React

- Built a responsive task management application using React, allowing users to add, edit and delete tasks.
- Utilized **React Hooks** for efficient **state management** and lifecycle handling.
- Styled the interface using **Tailwind CSS** to ensure a clean, mobile-friendly design.

E-COMMERCE APPLICATION-React, Redux Router, Tailwind CSS

- Developed a feature-rich online shopping platform with product listing, search and cart functionality.
- Implemented state management using **Redux Toolkit** to handle user authentication and cart updates.
- Designed responsive layouts with Tailwind CSS, ensuring smooth usability across devices.
- Integrated React Routed for seamless navigation between product, cart, and checkout pages.

PERSONAL PORTFOLIO - HTML, CSS, JS, REACT

- Created a personal portfolio website to showcase projects, skills, and achievements.
- Designed a modern, responsive layout to highlight fronted development expertise.
- Implemented interactive UI elements using React to enhance user engagement.
